

FOR IMMEDIATE RELEASE

**Sanderson MacLeod, Inc. Operational Statement:
COVID-19**

Sanderson MacLeod domestically produces twisted-wire brush products and assemblies for the cosmetic, medical, gun care and industrial markets. Based in Western Massachusetts, the Company employs more than 120 employees and utilizes high-capacity automation and production-optimizing flex scheduling.

While information regarding the COVID-19 pandemic is rapidly changing, our Company is actively monitoring the situation and placing several action plans into place in order to best ensure the safety of our employees while simultaneously providing for the demands of our valued supply partners.

As of March 18, 2020 all of our sites are operating normally and are at full capacity. We will be implementing additional hours of operation beginning on Monday, March 23, 2020.

We are not experiencing supply shortages at this time, and have an emergency on-hand stock reserve on site, should supply chain interruptions change or exceed current projections.

Rest assured that Sanderson MacLeod has taken a great number of appropriate measures to minimize any potential contamination at work including;

- Daily updates
- Heightened cleaning protocols
- Staggered communal times such as lunch and breaks
- Rapid response plans

It is our intention to scale operations in relation to production demand. We understand that the situation surrounding COVID-19 continues to be fluid and are actively monitoring the situation.

Further updates will be released should significant developments occur.
