

FOR IMMEDIATE RELEASE

**Sanderson MacLeod, Inc.
Operational Statement: COVID-19
April 13, 2020**

Deemed an “Essential Manufacturer” by the state of Massachusetts, Sanderson MacLeod domestically produces twisted-wire brush products and assemblies for the cosmetic, medical, gun care and industrial markets. Based in Western Massachusetts, the Company employs more than 120 employees and utilizes high-capacity automation and production-optimizing flex scheduling.

As of April 13, 2020, all Sanderson MacLeod sites remain fully operational and working extended hours to provide critical parts to our valued clientele.

While information regarding the COVID-19 pandemic is rapidly changing, our Company is actively monitoring the situation and prepared to place additional action plans into place should they be needed to best ensure the safety of our employees.

We have continued to receive and sustain our raw material inventories, and have emergency on-hand stock reserves on site should interruptions change or exceed current projections.

Rest assured that Sanderson MacLeod has taken a great number of appropriate measures to minimize any potential contamination at work including;

- Daily updates
- Heightened cleaning protocols
- Staggered communal times such as lunch and breaks
- Rapid response plans

It is our intention to scale operations in relation to production demand. We understand that the situation surrounding COVID-19 continues to be fluid and are actively monitoring the situation.

Further updates will be released should significant developments occur.
